WINEMAKING PROCESS

We harvest our Sauvignon Blanc in the cool of the night when the fruit is cool and fresh. (It looks a bit like the aliens have landed with the lights of the harvester shining down the hillside). The grapes are then crushed and pressed at the winery for a cool slow ferment.

WINEMAKING NOTES

2023 in the Adelaide Hills was an amazing year for white wines and all the expectations we have had are gathered in this superb bottle of Sauvignon Blanc. This pure, Sauvignon Blanc displays sensational citrus, honey and tropical flavours, minerality, elegance and has a fresh and vibrant finish. An excellent example of a signature grape of the Adelaide Hills from an outstanding vintage.
